COMMENTS ON EXAMINER'S REASONS FOR ALLOWANCE

Commissioner:

The Examiner's reasons for allowance provided in the prosecution history of this case are objected to, to the extent that they may give rise to reasoning that is inconsistent with the proper scope of the claims. The statement does not include at least (1) all the differences in the claims not found in the prior art of record, and (2) all the reasons why such differences are considered to define patentably over the prior art.

Claim construction requires each claim to be taken as a whole. Patentability of each claim is imparted by each claim as a whole. No portion of any claim is to be construed as more important for patentability than any other portion.

Applicants assert that each claim is allowable because all statutory requirements have been met, including, *inter alia*, the absence in the art of record of the inventions, as claimed, or any disclosure, teaching or suggestion (explicit or implied) that would make the claimed inventions obvious to a person having ordinary skill in the art.

Respectfully submitted,
